

To: Various Committee Meetings and Departments in GBHS, HDH, SBGHC

From: Andrea Rawn, Program Coordinator, Evidence-Based Care Program
Chair GBHN Order Set Committee

Date: March 2015

RE: 3rd and 4th Quarter Report 2014 - 2015 from GBHN Evidence Based Care Program and Order Set Committee

Please note that all Order Sets developed MUST have a clear physician/department based stakeholder(s) list. Protocols may be developed, but are not limited to, different disciplines outlining their scope of practice, with the understanding that ALL protocols must have an Authorized Provider order to initiate them and that the contents cannot be altered. All Authorized Providers are required to know the content of the protocols before initiating them.

Please also note that the policy and procedures to accompany new order sets are the responsibility of the corporations that utilize them. Stakeholders are encouraged to ensure ALL involved parties have been properly consulted and supporting documentation is in place.

For more in-depth description of changes, please refer to the Order Set Committee Meeting Minutes by contacting the Administrative Professional - Julia Metzger at jmetzger@hdhospital.ca or the Program Coordinator - Andrea Rawn at arawn@gbhs.on.ca

NEW ORDER SETS AND PROTOCOLS RELEASED FOR USE:

NOTE: The January 2015 meeting was cancelled and the March 2015 meeting did not meet quorum. Pending projects as a result have been delayed and will appear in the upcoming months.

NEW – *Diabetic Ketoacidosis (DKA) Initial Management Order Set* – Developed by Dr Becks and Patti Byne in cooperation with the Medical Services and Diabetes Education for network use, this order set will be owned by the Diabetes Education department. It is designed to be initiated in the ER department for emergent treatment of this population with supporting documentation and supporting allied health services.

MODIFIED ORDER SETS (Change Request Forms CRF) AND PROTOCOLS:

CRF – COPD Admission Order Set – Request from SBGHC to add Budesonide Nebules 0.5 - 1mg/2mL under medications. APPROVED as submitted.

CRF – Fractured Hip Post Op Order Set – Request to change suture/staple removal to be done by Authorized Provider 14 days post-op as a pre-selected order. This information will be communicated to the patient on discharge. APPROVED as submitted.

CRF – Total Hip Replacement Post-Operative Order Set – same as above

CRF – Total Knee Replacement Post-Operative Order Set – same as above

CRF – Total Hip/Total Hip Replacement Post-op Receiving Hospitals Order Set – same as above.

CRF – Vaginal Birth – Labour & Birth Admission Order Set – Request by HDH for removal of duplicate lab test. (Lupus Anticoagulant test) This is the same test as Anticardiolipin test. APPROVED as submitted.

CRF – MULTIPLE ORDER SETS - Nalbuphine is now available from being backordered in pharmacy. As a result the order sets that were affected were returned to the original order. Therefore Nalaxone has been removed for the treatment of puritis ONLY and replaced with Nalbuphine, as was the original intent. This change was a safety issue and therefore time sensitive, and was APPROVED by email due to lack of quorum at the March meeting.

CRF – Ischemic Stroke Non-Thrombolytic Admission Order Set - changes to this set of Order Sets centered around the replacement of the Stroke Assessment Scale (SAS) measurement tool and CNS scoring. It has been replaced through updated evidence with the National Institute of Health Stroke Scale (NIHSS) scoring tool. Discharge planning consult replaced with CCAC.

CRF – Ischemic Stroke Thrombolytic Therapy Admission Order Set – same

CRF – Ischemic/Hemorrhagic Stroke Admission Order Set Rehab Stage – same

WITHDRAWN CHANGE REQUEST FORMS

Withdrawn – NEW – EMERG – Transient Ischemic Attack (TIA) Work-Up Order Set; This order set was withdrawn as the original intent was to consolidate the amount of paperwork required to have this population worked up in ER and risk assessed and appropriate follow up arranged. This involved several departments and a significant change in workflow, so it was withdrawn until process mapping could better account for the changes and time investment.

BI-ANNUAL REVIEWS

BAR – A1C Ordering Protocol for Diabetes Educators - Changes title to: HgbA1C Ordering Protocol for Diabetes Educators. Change all references of A1C to: HgbA1C as this is the standard in our network for the lab.

BAR - Dispensing of Insulin and Diabetes Injectable Therapy Protocol for Diabetes Educators – Changes as listed above. Change: “As per GBHS policy” to read: “As per Corporate Policy”.

BAR - Fasting Plasma Glucose and Lab/Meter Ordering Protocol for Diabetes Educators – Changes as listed above.

BAR - Insulin Dose Adjustment Protocol – Changes as listed above.

BAR - Paediatric Insulin Dose Adjustment Protocol – Changes as listed above.

BAR – GBHS – OS only – Psychiatry Admission Order Set – Medications and dosages were brought into alignment with Best Practice recommendations for this type of admission. Associated documents added to accompany this document are The Daily Sleep Diary and Guidelines for Rapid Tranquillisation. These changes were approved by email to committee members as there was not quorum at the OS meeting initially

MODIFIED PATHWAYS:

General Order Set Changes (Requests involving all order set)
